

Eukaryotic Microbes Club 2015-16

LAB	Date
Docampo, Garfinkel	Aug 20 (Aug 27 if there is a conflict with an ILS activity)
Hajduk, Starai	Sept 17
Khang, Mensa-Wilmot	Oct 15
Arnold, Moreno	Nov 19
	WINTER BREAK
Hall, Striepen	Jan 21
Muralidharan, Schmidt	Feb 18
Lewis, West	March 17
McEachern, Sabatini	April 21
	SUMMER BREAK

The EMC provides an opportunity for University of Georgia students, postdocs, techs, and PIs to present their work and exchange ideas in a collegial environment. Participating laboratories from Biochemistry and Molecular Biology, Cell Biology, Genetics, Microbiology, and Plant Biology are united by their appreciation of the power of using eukaryotic microbes and a variety of approaches to address fundamental biological problems. The EMC also strives to complement rather than compete with existing journal clubs, interest groups, and lab meetings.

Please forward this email to anyone else who may be interested. We welcome everyone and will include you in future schedules.

The 2-lab format will be used for meetings this year. We would like one speaker from each lab to present a 30 min talk, including questions.

Note that a PI does not need to attend even when it is their lab's turn to present.

Food and refreshment

We encourage the sponsoring labs' (ie, PI's \$\$) to combine their talents and bring food and drink. Based on the previous meetings (25 people/meeting), 7 large pizzas and a case of soda should be enough. If food is delivered, it should arrive at 5:45 pm.

Date and Time

3rd Thursday of the month, 6 pm. If there is a conflict for a given date, please try to arrange a substitute lab and let David Garfinkel (djgarf@bmb.uga.edu) know as soon as possible.

Where

Life Sciences B118.
